Summary

With a strong passion for software development and a proven track record in leadership, I am driven to make a meaningful impact in the tech world. Currently serving as a Sales Team Lead at SDI Marketing, I've honed my leadership skills by inspiring teams to achieve exceptional results. However, my true passion lies in coding and software development.

I bring a diverse technical skill set to the table, including proficiency in Java, C++, and web development, honed through both formal education and hands-on projects. My analytical mindset, problem-solving abilities, and attention to detail are assets that translate seamlessly into software development.

What sets me apart is my ability to bridge the gap between technical concepts and real-world applications. During my tenure as a Business Analyst at Blockcube Technology, I honed my analytical mindset, allowing me to understand client requirements and translate them into effective software solutions.

At the core of my being, I am a champion dedicated to empowering others. With strong interpersonal and people skills, I thrive in collaborative environments. I am eager to join organizations that share my passion for making a positive impact and value-driven work.

Let's connect and explore how we can create meaningful contributions together.
